4 Here you can view and edit the user settings.

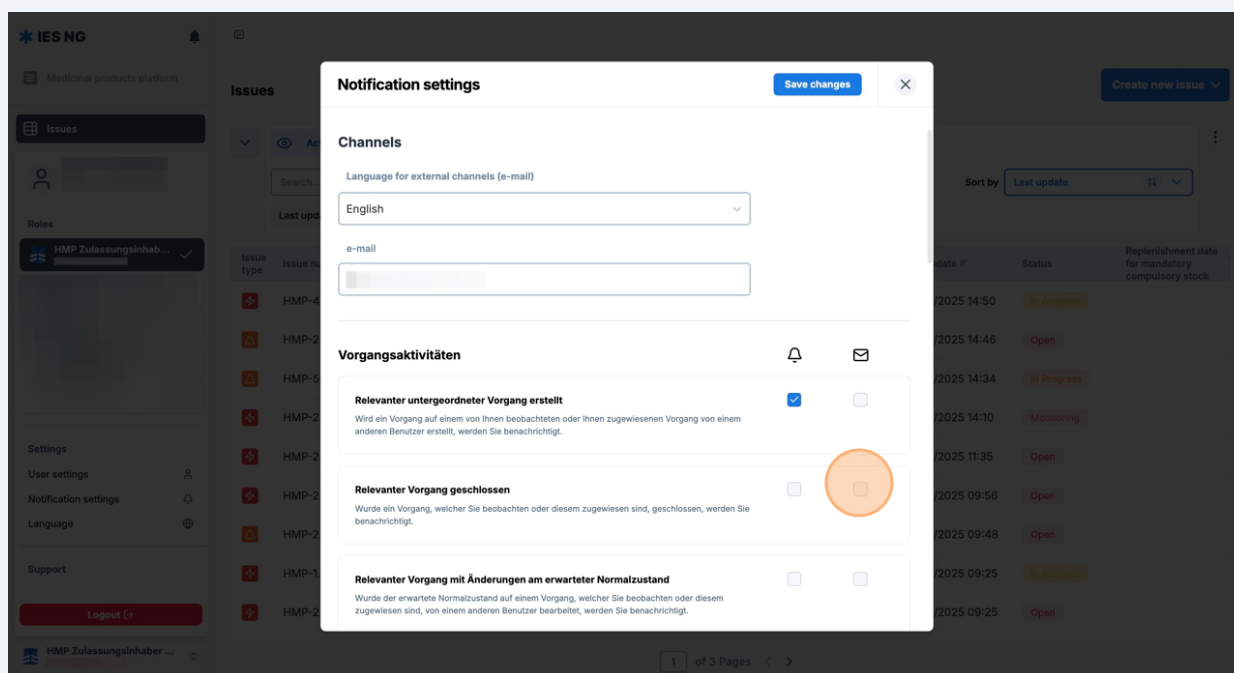

5 Click on "Notification settings".

6

Here you can configure notification settings. In-app and email notifications must be actively enabled; otherwise, you will not receive any notifications about new messages, decisions regarding mandatory stock requests, other edits, etc.

In-app notification:

A notification that appears directly within the system – indicated by the bell icon.

Email notification:

Sent to your registered email address – indicated by the envelope icon.

Note: You will only receive notifications (in-app or by email) if you are actively following an issue. An issue can be actively followed by selecting the eye icon on an issue.

7

By clicking the bell icon at the top left, you can view in-app notifications provided they have been enabled in the notification settings (see previous step).

By clicking on the notification, you will be taken directly to the affected issue.

The screenshot shows the IES NG Medicinal products platform. At the top left, a bell icon is highlighted with an orange arrow. Below it, the 'Issues' section is displayed. The interface includes a sidebar with 'Issues' and 'Support' links, a top navigation bar with 'Create new issue' button, and a main table of issues. The table has columns for Issue type, Issue number, Medicine name, Visible for, Disruption start date, Expected normal state, Last update, Status, and Replenishment date for mandatory compulsory stock. The table lists various issues for Voriconazol, Buprenorphin, Rivaroxaban, Fentanyl, and Co-Amoxi.

Issue type	Issue number	Medicine name	Visible for	Disruption start date	Expected normal state	Last update	Status	Replenishment date for mandatory compulsory stock
👁️	HMP-48	Voriconazol-	200mg, Lactab	FBHM,	21/05/2025	27/05/2025	03/06/2025 14:50	In Analysis

👁️	HMP-2...	Rivaroxaban-	10 mg, Filmt...	FBHM,	04/06/2025	18/06/2025	03/06/2025 11:35	Open
👁️	HMP-2...	Fentanyl-	100, transdermal...	FBHM,	04/06/2025	18/06/2025	03/06/2025 09:56	Open
⚠️	HMP-2...	Buprenorphin-	35ug/h, Tra...	FBHM,			03/06/2025 09:48	Open
👁️	HMP-1...	Co-Amoxi-	1000 mg, Filmt...	FBHM,	21/05/2025	08/08/2025	03/06/2025 09:25	In Analysis
👁️	HMP-2...	Co-Amoxi-	1000 mg, Filmt...	FBHM,	31/05/2025	31/07/2025	03/06/2025 09:25	Open

The **eye icon** indicates that you are following an issue.

If you are the author of an issue, you will automatically follow it.

However, if someone else created the issue, you must **manually activate the eye icon** to receive notifications – or the issue must be **assigned** to you.

8

By clicking on the three dots to the right of the issues overview, you access the view configuration.

The screenshot shows the 'Issues' overview in the IES NG Medicinal products platform. The table lists various issues with columns for Issue type, Issue number, Medicine name, Visible for, Disruption start date, Expected normal state, Last update, Status, and a checkbox for mandatory compulsory stock. A 'Configure view' dropdown menu is open, showing options to select columns and properties. An orange arrow points to the three dots icon in the top right corner of the table.

10

Issues can be displayed in grouped view – for example, by issue type. When grouping by a specific issue type, **only issues of that type** or **those linked to a issue of that type** will be shown.

Example:

If you group by disruption reports, those will be shown in the main view. Related mandatory stock requests will appear beneath them in an expandable sub-level.

If a market overview is linked to the disruption report, it will also be shown – provided you have the required access rights.

However, market requests that are subordinate to the market overview will not be shown.

The grouping function should be used carefully, as not all issues may be visible depending on the filter settings.

The screenshot shows the IES NG interface with the 'Issues' section active. The 'Active reports & mandatory camp and market withdrawal' filter is selected. The 'Group by' dropdown menu is open, showing options: 'No grouping', 'Disruption report', and 'Replenishment date for mandatory compulsory stock'. The table below lists various issues with columns for Issue type, Issue number, Medicine name, Visible for, Disruption start date, Expected normal state, Last update, Status, and Replenishment date.

Issue type	Issue number	Medicine name	Visible for	Disruption start date	Expected normal state	Last update	Status	Replenishment date for mandatory compulsory stock
+	HMP-48	Voriconazol- 200mg, Lactab	FBHM,	21/05/2025	27/05/2025	03/06/2025 14:50	In Analysis

You have the option to filter by various dimensions (columns). By selecting "Save as," custom filters can be saved.

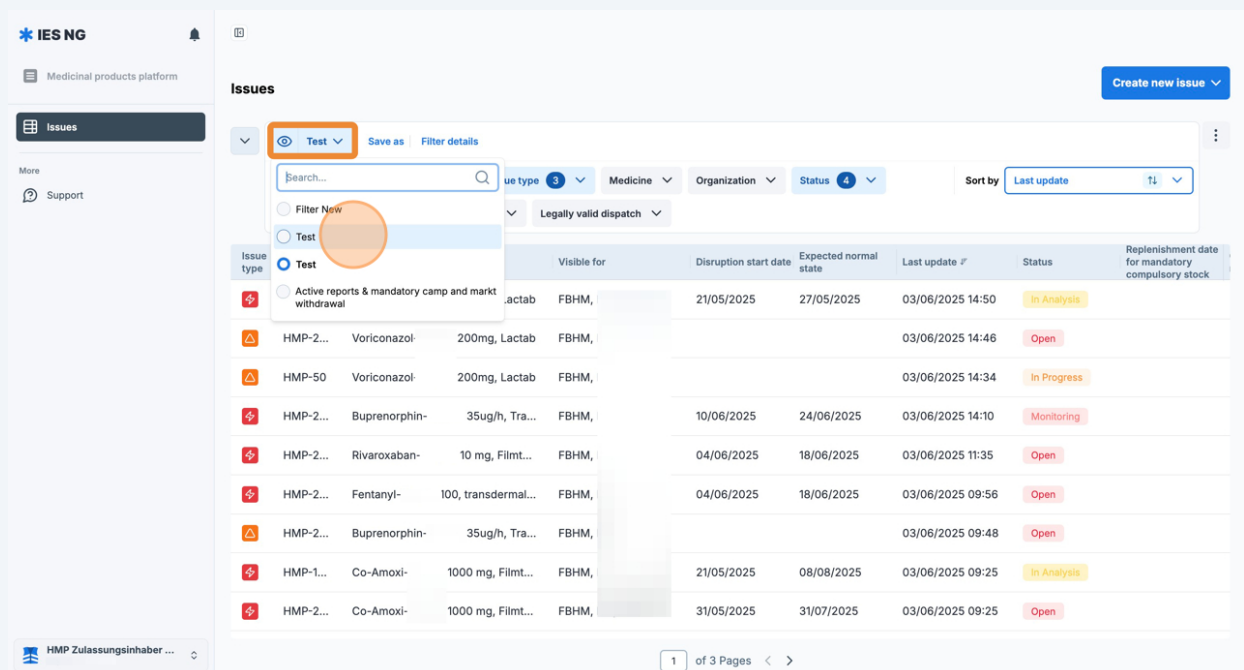

The screenshot shows the IES NG interface with the 'Issues' section active. The 'Save as' button is highlighted, and a dropdown menu is open showing options: 'Disruption report', 'Mandatory compulsory stock request', 'Market withdrawal', 'Market overview', and 'Market request'. The table below lists various issues with columns for Issue type, Issue number, Medicine name, Visible for, Disruption start date, Expected normal state, Last update, Status, and Replenishment date.

Issue type	Issue number	Medicine name	Visible for	Disruption start date	Expected normal state	Last update	Status	Replenishment date for mandatory compulsory stock
