

Configuring A New FTP Interface

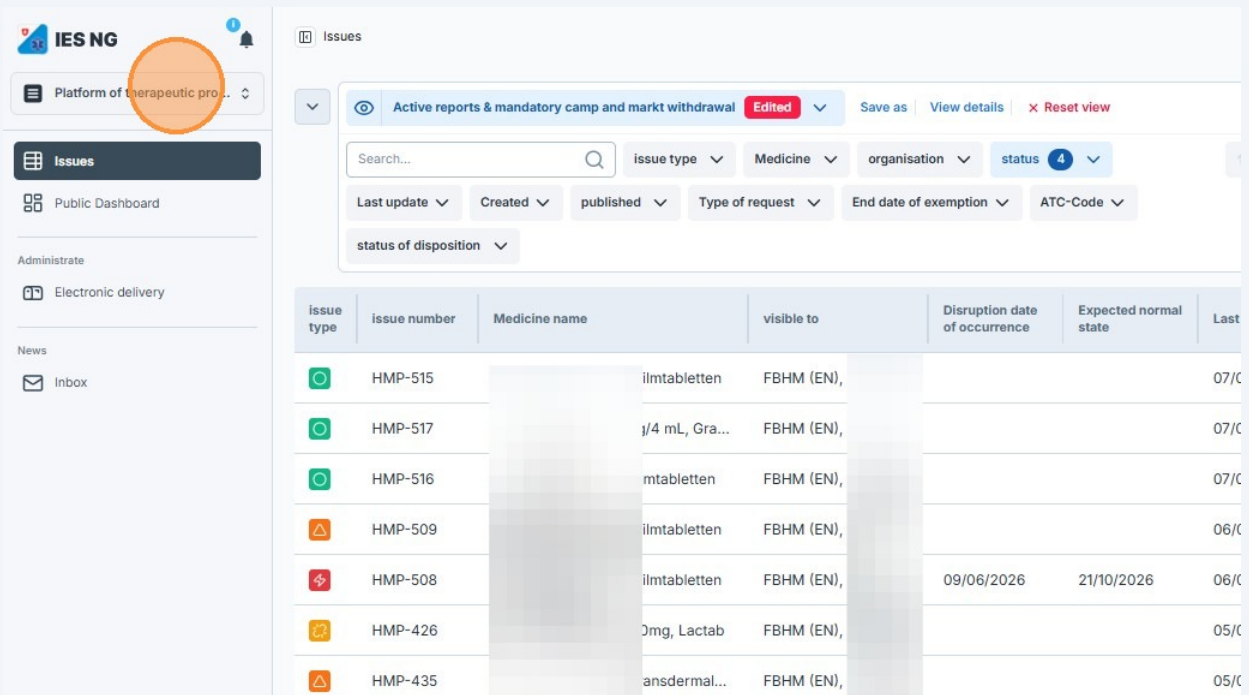

This manual gives a step-by-step guide on how to configure a new automated FTP interface to easily import stock and sales figures into the HMP. This includes how to configure host details, user credentials, and folder paths to ensure your data transfer process is correctly established. Please ensure you get in touch with FONES before activating the interface as they need to enable the interface on their side as well.

HMP Navigation

- 1 Log in to the HMP as usual. Make sure you are in the role of AH Reporting Party.

issue type	issue number	Medicine name	visible to	Disruption date of occurrence	Expected normal state	Last update	status
	HMP-515		FBHM (EN), ...			07/06/2026 07:30	Compl
	HMP-517		FBHM (EN), ...			07/06/2026 07:21	Open
